

Date:

Wednesday Challenge Form

Group Members: Paul, Alex, Jon

Problem Statement: We have to use an Adhesive to glue together two exactly the same Pieces of metal together.

Approach: We used Epoxy to glue together the Two metal pieces, we did not get to test Today, however it was still drying, but later today we hear about how it can't be tested, but there are no winners in this challenge.

Solution: Epoxy

Lessons Learned: There are not winners in Every single Wednesday challenge.
