Date:

Wednesday Challenge Form

Group Members: Paul, Sophia, Garen, Andrew

Problem Statement: WE must figure out how A machine would tell the difference bewteen a Cat and a dog.

Approach: we thought that if we had the cat And the dog step in mud that the machine Would be able to see the prints and know they Were different

Solution: Justin's team won by making it so the Cat and dog licked water because of different Tounges.

Lessons Learned: We should have made it so The animals lick the water.
