

Date:

## Wednesday Challenge Form

Group Members: Paul, Justin, Shaunt, Tyler

Problem Statement: Cut a piece of wood as close as possible to two inches on every side.

Approach: Cut the piece of wood as close as possible to two inches then begin measuring to see how much we need to shave and then we got the best score.

Solution: My team won by cutting and shaving the piece of wood close and accurate.

Lessons Learned: Do everything exactly the same as we did this time.
